Projects

Dynamic Jobs
Developed an interactive dashboard using Microsoft Dynamics 365 Business Central to analyze job costs, revenue, profitability, salesperson performance, and Top 10 profitable jobs using DAX measures.

Trade Debtor Customer Analysis
- Developed interactive Power BI dashboards to analyze customer sales, revenue trends, invoice performance, aging, and outstanding balances. Used slicers, filters, and visualizations to track customer performance, identify top customers, and support receivables and retention analysis.

Financial Performance Dashboard
- Developed interactive Power BI dashboards to analyze revenue, costs, profit, expenses, and cash flow. Created monthly, quarterly, and historical reports with filters, drill-throughs, and interactive visuals to track financial performance and trends.

Sales Performance
- Developed an interactive Power BI dashboard to analyze sales revenue, trends, and top-performing customers. Created DAX measures, transformed data using Power Query, and implemented KPI cards, charts, filters, and slicers for dynamic sales analysis.

Adventure Works
Developed an interactive Power BI dashboard using the Adventure Works dataset to analyze sales performance, profitability, and product trends. Utilized DAX, Power Query, and data modeling to generate actionable business insights.
